

Sustainability Policy

Principles

- To comply with, and exceed where possible, all applicable legislation, regulations and codes of practice.
- To work with suppliers who operate organic, sustainable and ethical methods of farming and employment.
- To integrate sustainability considerations into all our business decisions.
- To ensure that all staff are fully aware of our Sustainability Policy and are committed to implementing and improving it.
- To minimise the impact on the sustainability of all office and transportation activities.
- To make clients and suppliers aware of our Sustainability Policy, and encourage them to adopt sound sustainable management practices.
- To review and continually strive to improve our sustainability performance.

Practical steps

Sourcing & partners

- Work with farmers who adopt organic and sustainable farming practises, and use recycled or recyclable materials.
- Pay a premium above the fair trade price for ingredients.
- Support our factory's charity to improve the lives of farm and factory workers', their families and the wider community.
- Ship, rather than air freight, unless absolutely necessary.

Working practices and advice to customers

- Encourage customers where possible to order larger quantities, less often, to reduce the number of deliveries.
- Ensure customers and suppliers are aligned with JTC on both ethics and sustainability and comply with our Ethical trading policy.
- Ensure that all staff are aware of our policies and to communicate these to our customers.
- Include a copy of our Sustainability and Ethical policies with all proposals.

Packaging

- Use FSC, recycled, recyclable and biodegradable materials where possible.
- Consider the use of vegetable-based inks on all packaging and use where possible.

Office and travel practices

- Minimise the use of paper and other consumables by only printing where absolutely necessary, and when doing so printing double-sided, and reduce waste.
- Recycle all materials where possible.
- Reduce energy consumption by using energy-efficient light bulbs and educating staff not to use lights when not necessary and not to waste water, when filling up the kettle only using as much water as is needed.
- Walk, cycle or use public transport to travel from home to work and to meetings where possible.
- Enrol all employees into the Cycle to Work scheme and encourage to use.

Date of next review - January 2024
